

Bakery Meal

Bakery Meal is a high-energy, nutrient dense, highly palatable dried component for livestock feed, which has a greater nutrient value than corn. Bakery Meal is a mixture of breads, cakes, candies, chips, cookies, crackers, doughs, flours, pastas, snack foods, tortillas, pizzas, nuts, cereal grains and related food by-products which have been separated from non-edible material, then mixed, ground and dried. Bakery Meal can be used in broiler, turkey, layer, swine, dairy, and beef cattle feed producers.
